SERVING SOUTH DADE

Here is my new scheme to make money this year

BY ERNIE SOCHIN

Councilmember

Well I have tried other ways of making it into the big bucks category, so far without success.

None of the failed or failing banks have offered me a multi-million dollar job, nor has FPL offered me the CEO job as yet, so I decided to

strike of on my own. I have joined the investment firm of Rothstein, Madoff, Ponzi & Sochin, BSA.

We will be selling futures on pizza and pomegranates. No one has offered these potentially high paying futures as yet and we are now ready to go to market. As a show of good faith we are offering a written "lifetime guarantee" that says that we "guarantee that you and your fellow investors will live your entire lifetimes." You can't beat that.

Here's how it works. You simply send some cash to this newspaper marked to my attention, and clearly stating "Cash Enclosed!" This will eliminate any problems with the postal authorities or anyone in the newspaper's mailroom.

The reason for cash is to avoid any possible government interference, which none of us really want or need.

The profit from your investments will help our firm to make large donations to a variety of charitable organizations as well as give generously to any politician who will allow me to stand next to them for a photo to hang on my wall next to my degrees.

Some might ask if there indeed are futures in pizza. To them I say, "Wake up and smell the pepperoni."

(Disclaimer: Community Newspapers has no interest in this scheme/plan unless, of course, they wish to invest, in which case I shall accept their large contribution.)

How will you be repaid? It's a logical question. Your stock will increase in value as rapidly I am able to make the proper claims and press releases. Warning: Do not attempt to sell or cash in your stock as this will upset the system for everyone else. Just keep investing and watch your net worth rise.

For those of you unwilling to take this broad step forward, I offer the following: Sign up for my new distributorship of Chaude Luft products.

This is an easy one for anyone willing to work for his or her money. All you need to do is set up meetings inviting others to join in this plan. They give you some money, which of course you send to corporate (me) until they themselves can set up their own distributorships and send some money to you and the rest to corporate.

The more people that sign up, the better for all of us. The best part is that you needn't purchase any Chaude Luft products as your distributorships will take care of that. It is a win-win operation for me, and the very first who sign up. Cost for a distributorship is \$1,000 each, payable in cash care of this newspaper. Who knows, if business gets big enough we might be able to advertise in the newspaper as well.

Editor's note: Once again, Councilman Sochin is writing tongue-in-cheek. Please don't send money to this newspaper. Maybe you can make a contribution to your favorite charity.
